

MultiModus

Accounting Ease

You do a little, MultiModus does the rest!

How does MultiModus work?

MultiModus uses the E-Bookkeeping online environment to work with you to get and keep your accounts perfectly up-to-date.

First your needs are identified and then the accounts are set up to suit your specific situation and business type.

You then have the choice of actively working on your accounts yourself, with MultiModus taking a directing and controlling role, or, if that suits you better, letting MultiModus do all the work.

At a minimum, you will be active in the delivery of data via your mobile camera app for purchase receipts and the delivery of sent and received invoices within a Dutch secure cloud environment set up especially for you.

In all cases, you will receive extensive instruction and tools from MultiModus to make your administrative burden as understandable and easy as possible.

MultiModus periodically (usually quarterly) processes your accounts and sends the VAT return.

At the end of the financial year MultiModus prepares your annual accounts and takes care of your income tax return (IB-ZVW).

Do you not speak Dutch? No problem.

What MultiModus does

Accounting

We link your business bank account and process all credits and debits in the accounts.

Tax returns

We take care of VAT and income tax returns.

Annual reports

We prepare an annual financial report so you have insight into your operating results.

About MultiModus

Since 2014, I have been providing accounting services to small business owners in consulting, construction, hospitality and ICT. Having worked in these industries myself for many years as an independent entrepreneur, I understand better than anyone else how an entrepreneur wants to be helped.
